The status of the claims is as follows:

Claim 1-7 are herein addressed below.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 5, the phraseology "each individually provided" appears awkward. The language appears redundant.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al. (6,739,646 B2). Suzuki et al. (6,739,646 B2) disclose a door closer (1) comprising a striker (column 4, line 35) attached to the vehicle body (2) and engaged by latching mechanisms (3 and 4), a driving apparatus in the form of an assisting mechanism (7) having two motors/driving sources (81 and 91) in parallel (see figure 2) and having gears. Suzuki et al. (6,739,646 B2) fails to specifically disclose all of the gears connected to one another. It is well known and inherent that Suzuki et al. (6,739,646 B2) has gears between an input and output device and that all of the gears are connected to each other in one fashion or another and therefore would be obvious to one of ordinary skill in the art to provide the necessary gearing between the drive source and the output source (the door moving). [note: it should be understood that

motors which drive closure(s) would have gear(s) for driving and it is inherent that the motors 81 and 91 have gears which help drive the closure and latch assemblies. Furthermore, all gears are connected in one way or another between an input, i.e., source, and output.]

Depending on the applicant's amendments, claims 1-2 may be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 3-6 are allowable.

Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

The applicant's arguments have been considered but are not deemed persuasive. As discussed in detail above, all gears are connected in one fashion or another between an input source and a mechanical output.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
